PRESENTATION POINTERS

BROUGHT TO YOU BY DAN ZAWACKI

THE FINAL FOUR

- TODAY = PRESENTATION OVERVIEW
- THURSDAY = WORKING DAY FOR DATA COLLECTION
- NEXT TUESDAY = EXAM REVIEW
- NEXT THURSDAY = EXAM

*A COUPLE OOOHCDs DURING FINALS WEEK.

TEACHABLE MOMENTS

- An Institutional Review Board (IRB) is an administrative body that protects the rights and welfare of human research subjects by reviewing, approving, and monitoring research studies. IRBs ensure research complies with ethical standards and regulations, such as the Common Rule. Approval is required before starting any study involving human participants.

BUT WAIT, THERE’S MORE!

Key Aspects of IRBs:

•**Purpose:** To protect participants from research-related risks, ensure informed consent, and maintain ethical standards.

•**Authority:** They have the power to approve, require modifications for, or disapprove research.

•**Membership:**

Comprised of at least five members with varying backgrounds to ensure complete, qualified review of research activities.

•**Process:** Researchers must submit a protocol, which is then reviewed via full board, expedited, or exempt, depending on the level of risk.

•**Consequences:** Failure to obtain approval can result in halting studies, non-publication of data, or legal liability.

FINALLY!

Steps to Obtain IRB Approval:

1. **Determine if IRB Review is Necessary:** Research involving human subjects typically requires approval.
2. **Submit Application:** Submit a protocol, informed consent documents, and study materials to the institution's IRB.
3. **Level of Review:** The IRB determines if the study is exempt, requires expedited review (low risk), or full board review (high risk).
4. **Approval/Modification:** The IRB may approve, ask for revisions, or disapprove the study.
5. **Ongoing Compliance:** Researchers must report changes and obtain continuing review, usually annually.

IRBs are typically located at research institutions, or investigators may use independent/contract IRBs.

MY IRB SOURCES

- The Office of Research Integrity.gov
- USDA.gov

PUBLIC SPEAKING IS THE NUMBER ONE FEAR!

- According to Jerry Seinfeld, a comedian for half of a century, public speaking is the number one fear.
- Death is number two.
- This means people would rather be in the coffin instead of giving a eulogy.

THE GOOD NEWS!

- You are alive and well.
- There is no sign-up sheet.
- There are no performances.
- Submit your Presentation by 5/10…no exceptions.
- We have a couple of days during finals week for OOOHCD.

THESE PRESENTATIONS ARE WORTH 100 POINTS

- I do not grade as strict as a speech professor.
- This round of public speaking is still formal.
- You do not have to get up in front of the class though.
- As long as you have slides and a voice recording, you are good!

WHAT ARE MY OPTIONS???

- Everyone has 5-10 minutes.
- You can speak for the whole time with slides for 5-10 minutes.
- Consider about 10 slides, give or take.
- Prezi or PowerPoint are fine.
- Panopto is the latest innovation; you can use that too.

ANOTHER OPTION???

- Since everyone has up to 10 minutes, you can budget your time with a supplemental digital media source.
- In other words, you may want to show a short video clip that complements your presentation…as long as you are speaking for about 5 minutes.
- Where you choose to include the video clip is up to you.

BE NATURAL AND COMFORTABLE

- No need to worry about contractions and super formal diction.
- Focus on being engaging and relatable.
- Time is of the essence, no need to verbally cite sources.

ME, MYSELF, AND I???

- Yes, you can use first person….even second.
- Be anecdotal if you want.
- In fact, some YOU is a good way to engage the audience.

AS YOU CAN SEE, MEDIA AND DESIGN ELEMENTS ARE REQUIRED.

*Presentation software

*Video clip?

IF YOU ACTUALLY ARE ON CAMERA…

- Make sure you are in at least office casual or UA attire.
- No pajamas, hats, Snuggies, hoods, bathrobes.
- No bedhead.

ON CAMERA CONTINUED…

- Make sure the set looks professional.
- You know what I mean.
- Too much junk or clutter in the background is distracting.

MIXED OPTION???

- Some students like the best of all worlds.
- You can start off with a slide or two.
- Include the link to your video in the PowerPoint.
- A great way to set up and deliver the clip.

CONSIDER YOUR AUDIENCE

- Many of us are not too familiar with your subject matter.
- Background beyond what you shared before is nice.
- We can only keep up with 3-4 main points in such a short period of time.
- Fewer pts with greater detail is a plus!

GENERAL PUBLIC SPEAKING POINTERS…

- Have a sense of structure.
- Budget your time accordingly.
- Have a true intro to grab our attention and state your purpose.
- Your audience can only keep up with 3-4 main points.

AH, UM, LIKE, YA KNOW, GNOME SAYIN’

- Avoid filler.
- Better to pause than use filler.
- Get in the habit of using transitions much like you would in a paper.

WHAT IS THIS ABOUT, ZAWACKI?

- This is a follow-up to any assignment you have done in here!

WELL JUST ABOUT ANY…

- The only ones that do not make sense are the emails, and exams.
- In short, you are either converting something you have done already to a presentation…
- Or having a presentation as a sequel!

MY BIGGEST “DON’T”

- Avoid reading to us too much, word for word.
- This is a really tough look on camera.

WE ALL SLIP UP!

- Stutter
- Sputter
- Wrong word
- Don’t let it rattle you.

IF YOU REMEMBER ONE THING AND ONE THING ONLY…

- Plan on what you are going to say and NOT how you are going to say it.
- I had to give a 10-minute speech at Convocation in a packed venue.
- I wrote a speech.
- I had my contact lenses in.
- You might know where this is going…

BY MAY 10,

- Make sure you submit your Presentation in the appropriate drop box.
- This will help us run smoooothly.
- You can knock this out early if you want.

LASTLY…

- Give yourself plenty of time.
- It may take more than one take.
- A little humor goes a long way, or so I've heard.
- Try not to obsess!

ANY QUESTIONS?
